Author; **issue number**: page number.

Aiken, M.W.; **3**: 82.
Andre, T.; **4**: 105.

Bailey, J.; **1**: 1.
Bain, A.; **3**: 92.
Baker, G.; **1**: 33.
Beasley, R.E.; **4**: 115.
Bessemer, D.W.; **4**: 110.
Billings, D.M.; **1**: 12.

Carlsen, D.D.; **4**: 105.
Carlson, R.D.; **1**: 6.
Carr, A.; **4**: 137.
Carroll, A.; **3**: 92.
Casey, C.; **4**: 131.
Clariana, R.B.; **2**: 58.
Cobb, K.L.; **1**: 12.
Cronin, K.A.; **2**: 37.
Cronin, M.W.; **2**: 37.

Ellis, H.D.; **3**:73.
ERIC Clearinghouse on Information Resources; **2**: 70; **4**: 138.

Fahy, D.; **1**: 27.
Finkelstein, M.W.; **4**: 125.

Grabowski, B.L.; **1**: 6.
Guthrie, B.M.; **3**: 100.

Houghton, S.; **3**: 92.
Houlihan, P.A.; **4**: 125.

Johnson, L.A.; **4**: 125
Jones, L.M.; **3**: 77.

Kane, D.J.; **3**: 77.
Kline, D.E.; **2**: 64.
Kolosh, K.P.; **4**: 110.

Larsen, R.E.; **1**: 17.
Lister, D.B.; **4**: 115.

McPherson, M.; **3**: 100.

Nakamura, A.Y.; **1**: 27.
Nesbit, J.C.; **4**: 119.

Okey, J.R.; **2**: 47.

Preston, N.R.; **2**: 70; **4**: 138.

Reid, C.M.; **1**: 27.

Sah, F.B.; **3**: 92.
Santiago, R.S.; **2**: 47.
Shaw, D.S.; **2**: 54.
Shlecter, T.M.; **4**: 110.
Simsek, A.; **3**: 86.
Steinberg, E.R.; **2**: 42, 69.
Stephenson, S.D.; **1**: 22.

Tsai, B.; **3**: 86.

Walters, R.F.; **1**: 27.

Title Index

Adaptive Instructional Use of the DDx&Tx System. Houlihan, P.A., Finkelstein, M.W., Johnson, L.A.; **4**: 125.

Book Review. *The Effects of Distance Learning: A Summary of the Literature* by M.G. Moore and M.M. Thompson with B.A. Quigley, G.C. Clark, and G.C. Goff. Steinberg, E.R.; **2**: 69.

Book Review. *Instructional Technology: Past, Present, and Future* edited by G.J. Anglin. Carr, A.; **4**: 137.

Computer-Aided Instruction for Adult Professionals: A Research Report. Shaw, D.S.; **2**: 54.

Computer-based Simulation Systems and Role-Playing: An Effective Combination for Fostering Conditional Knowledge. Shlecter, T.M., Bessemer, D.W., Kolosh, K.P.; **4**: 110.

A Critical Analysis of the Theoretic Foundations of Interactive Video Instruction. Cronin, M.W., Cronin, K.A.; **2**: 37.

Curriculum Approaches in Special Education Computing. Bailey, J.; **1**: 1.

The Effects of Advisement and Locus of Control on Achievement in Learner-Controlled Instruction. Santiago, R.S., Okey, J.R.; **2**: 47.

The Effects of Computer Self-Efficacy on Direction-Following Behavior in Computer Assisted Instruction. Carlson, R.D., Grabowski, B.L.; **1**: 6.

Effects of Learning Style Preferences, Attitude and GPA on Learner Achievement Using Computer Assisted Interactive Videodisc Instruction. Billings, D.M., Cobb, K.L.; **1**: 12.

The Effects of Student Instructor Interaction and Paired/Individual Study on Achievement in Computer-Based Training (CBT). Stephenson, S.D.; **1**: 22.

The Efficacy of a Customized Approach to Computer Assisted Instruction. Guthrie, B.M., McPherson, M.; **3**: 100.

ERIC Research Abstracts selected by N.R. Preston. ERIC Clearinghouse on Information Resources; **2**: 70; **4**: 138.

An Evaluation of the Application of Interactive Video for Teaching Social Problem-Solving to Early Adolescents. Bain, A., Houghton, S., Sah, F.B., Carroll, A.; **3**: 92.

The Impact of Cooperative Group Composition on Student Performance and Attitudes During Interactive Videodisc Instruction. Simsek, A., Tsai, B.; **3**: 86.

Instructional Design of a Computer-Assisted Work-Related Literacy Program *(Application Report)*. Baker, G.; **1**: 33.

Kanji-Lookup: A Computer-Based Multi-Indexed System for Beginning Students of Japanese. Walters, R.F., Fahy, D., Nakamura, Y., Reid, C.M.; **1**: 27.

Low-cost, High-volume Exploitation of Computer Technology in Education *(Application Report)*. Ellis, H.D.; **3**: 73.

Motivation and Item Sequencing in Paired-Associate Drill. Nesbit, J.C.; **4**: 119.

Network Use in Central Management of Large University Physics Courses *(Application Report)*. Jones, L.M., Kane, D.J.; **3**: 77.

The Potential of Computer-Based Telecommunications for Instruction. Steinberg, E.R.; **2**: 42.

Prescriptions in Reading Computer-Assisted Instruction: Reading versus Writing. Clariana, R.B.; **2**: 58.

Journal of Computer-Based Instruction
Autumn 1992, Vol. 19, No. 4, 141-144.

An Evaluation of the Application of Interactive Video for Teaching Social Problem-Solving to Early Adolescents. Bain, A., Houghton, S., Sah, F.B., Carroll, A.; **3**: 92.

The Impact of Cooperative Group Composition on Student Performance and Attitudes During Interactive Videodisc Instruction. Simsek, A., Tsai, B.; **3**: 86.

Instructional Design of a Computer-Assisted Work-Related Literacy Program *(Application Report)*. Baker, G.; **1**: 33.

Kanji-Lookup: A Computer-Based Multi-Indexed System for Beginning Students of Japanese. Walters, R.F., Fahy, D., Nakamura, Y., Reid, C.M.; **1**: 27.

Low-cost, High-volume Exploitation of Computer Technology in Education *(Application Report)*. Ellis, H.D.; **3**: 73.

Motivation and Item Sequencing in Paired-Associate Drill. Nesbit, J.C.; **4**: 119.

Network Use in Central Management of Large University Physics Courses *(Application Report)*. Jones, L.M., Kane, D.J.; **3**: 77.

The Potential of Computer-Based Telecommunications for Instruction. Steinberg, E.R.; **2**: 42.

Prescriptions in Reading Computer-Assisted Instruction: Reading versus Writing. Clariana, R.B.; **2**: 58.

Relationship of Learning Style to the Effectiveness and Acceptance of Interactive Video Instruction. Larsen, R.E.; **1**: 17.

A Study of Student Achievement Utilizing Different Pacing Strategies for Textual and Pictorial Information. Kline, D.E.; **2**: 64.

Transactions and Answer Judging in Multimedia Instruction: A Way To Transact with Features Appearing in Video and Graphics Images *(Application Report)*. Casey, C.; **4**: 131.

Use of a Microcomputer Simulation and Conceptual Change Text To Overcome Student Preconceptions about Electric Circuits. Carlsen, D.D., Andre, T.; **4**: 105.

User Orientation in a Hypertext Glossary *(Application Report)*. Beasley, R.E., Lister, D.B.; **4**: 115.

Using a Group Decision Support System as a Teaching Tool. Aiken, M.W.; **3**: 82.

Subject Index

a

Academic advisement used in computer based instruction; **2**: 71.
Accommodator; **1**: 12, 18.
Achievement; **3**: 94, 96.
Active experimentation-reflective observation continuum; **1**: 18.
Adaptive advisement; **2**: 47.
Adaptive instruction; **4**: 126.
Adaptive thinking; **1**: 1.
Administrative directions; **1**: 6.
Adult literacy; **1**: 33.
Advisement; **2**: 47.
Allen's attitude toward CAI semantic differential tool; **1**: 12.
Analytical tools and research issues for interactive media; **2**: 71.
Answer judging in multimedia instruction; **4**: 131.
Anticipation procedure; **4**: 121.
Applications of the self-efficacy theory to IVI; **2**: 38.
Applying the technologies of CAI and expert systems to implementation of cognitive and metacognitive strategy instruction programs; **4**: 140.
Approaches to individualized computer-assisted instruction in ESL (English as a Second Language); **2**: 70.
Assimilator; **1**: 12, 18.
Atkinson's risk-taking model of achievement motivation; **4**: 121.
Attention; **3**: 94, 96.
Attitude; **3**: 94, 96.
Attitudes; **3**: 89.
AutoCAD; **2**: 54.
AutoLISP; **2**: 54.

b

Benefits of using a GDSS in a classroom; **3**: 84.
"Brainstorm"; **3**: 82.
"Broken Circles" exercise; **3**: 88.

c

CAI and productivity; **2**: 55.
CAI content impacting reading skills; **2**: 62.
CAI effectiveness in general; **2**: 54.
Changes of interfaces; **4**: 139.
Cognitive overload; **4**: 116.
Cognitive processes and outcomes associated with student knowledge base development; **4**: 139.
College business statistics and CBT; **1**: 22.
College physics; **4**: 105.
Command line interface (CLI); **4**: 139.
Competence motivation; **4**: 121.
Comprehension fostering techniques; **1**: 34.
Computer as writing tutor; **2**: 70.
Computer assisted instruction (CAI); **1**: 6, 33.
  physical education; **3**: 100.
Computer assisted interactive videodisc instruction (CAIVDI); **1**: 12.
Computer based education (CBE); **3**: 77.
Computer self-efficacy; **1**: 6.
Computer Self-Efficacy scale (CSE); **1**: 8.
Computer-aided design (CAD) system; **2**: 54.
Computer-aided instruction for adult professionals; **2**: 54.
Computer-aided instruction in language learning; **1**: 27.
Computer-assisted work-related literacy program; **1**: 33.
Computer-based instruction (CBI); **2**: 47.
  accounting education; **2**: 70.
  secondary school science; **2**: 65.
Computer-based instruction pacing strategies; **2**: 64.
Computer-based Japanese character lookup; **1**: 27.
Computer-based learning aids for the Japanese language; **1**: 27.
Computer-based simulation systems; **4**: 110.
Computer-based study strategies; **4**: 140.
Computer-based telecommunications; **2**: 42.
Computer-based text analysis; **2**: 70.
Computer-based training (CBT); **1**: 17, 22.
Computer-based training simulation system (SIMulation NETworking); **4**: 110.
Computer-extended thinking; **1**: 1.
Computer-integrated classrooms; **2**: 70.
Computerized reading program; **4**: 139.
Computers in the whole language classroom; **2**: 70.
Computing in the schools; **1**: 1.
Conceptual change text (CCT); **4**: 105.
Concrete-Abstract continuum; **1**: 17.
Conditional knowledge; **4**: 110.
Control over the instructional presentation; **2**: 64.
Convection Initiation; **4**: 133.
Converger; **1**: 12, 18.
Cooperation training; **3**: 88.
Cooperative group composition; **3**: 86.
Cooperative learning; **3**: 86.
Creative approaches to educational computing; **1**: 1.
Curriculum approaches; **1**: 1.
Curriculum models; **1**: 1.
Customized CAI; **3**: 100.

d

Dental Diagnosis and Treatment (DDx&Tx) System; **4**: 125.
Dental education; **4**: 125.
Design of a CAI system for adult professionals; **2**: 56.
Designing CAI for the low-literate adult; **1**: 34.
Diagnosis Decision Tree; **4**: 127.
Diagnostic transactions; **4**: 132.
Differences in media delivery systems when used for instructional purposes; **3**: 98.
Differential effects on learner outcomes associated with the type of medium employed for teaching problem-solving; **3**: 93.
Direct instruction via telecommunications; **2**: 43.
  English; **2**: 44.
  nutrition; **2**: 44.
  social studies; **2**: 43.
Direction-following behavior; **1**: 6.
Directive advisement; **2**: 47.
Distance education; **2**: 69.
Diverger; **1**: 12, 18.
Dreyfus and Dreyfus five-stage model of skill acquisition; **2**: 38.
Dropout procedure; **4**: 121.

e

Educational applications of computer networks and bulletin boards; **2**: 42.
Educational computing; **1**: 1.
Effect of cooperation versus competition; **1**: 22.
Effect on performance of internal pacing versus external pacing; **2**: 64.
Effectiveness and efficiency of adaptive and non-adaptive instruction using the DDx&Tx System; **4**: 126.
Effectiveness and efficiency of adaptive instruction; **4**: 125.
Effectiveness and efficiency of interactive videodisc simulation lessons; **4**: 129.

Effectiveness of a CBI tutorial in accounting education; **2**: 70.
Effectiveness of a computer simulation in electricity; **4**: 105.
Effectiveness of a computer-based training simulation system; **4**: 111.
Effectiveness of computer-based simulation systems combined with appropriate role-playing activities; **4**: 111.
Effectiveness of interactive video instruction; **1**: 19.
Effects of a computer-based reading project on students' attitudes and performance in reading and writing; **4**: 139.
Effects of an integrated learning system; **4**: 140.
Effects of distance learning; **2**: 69.
Effects of interactive video-based instruction for teaching social problem-solving; **3**: 93.
Effects of word processing on student writing; **4**: 138.
Efficacy of cooperative learning for technology-based instruction; **3**: 86.
Efficacy of simulations used alone and in conjunction with conceptual change text; **4**: 108.
Evaluative advisement; **2**: 47.
Evaluative directions; **1**: 6.
Expanding experiential horizons; **1**: 3.
Expectations of CAI; **2**: 55.
Expert system development in the classroom; **4**: 139.
Expert system programming technology; **4**: 140.
Extensions to Kanji-Lookup; **1**: 31.

f

Factors influencing direction-following behavior; **1**: 7.
Factors that determine the success of CAI for adults; **2**: 54.
Factors which influence the effectiveness of learning in small groups; **3**: 86.
The Factory; **4**: 139.
"First letter searching"; **4**: 116.
Five-stage model of skill acquisition; **2**: 38.
Fostering conditional knowledge; **4**: 110.
Functional context method of instruction; **1**: 34.

g

Gender difference in computer learning environments; **2**: 58, 62.
Gender differences between graphical user interfaces and command line interfaces in computer instruction; **4**: 139.
Geographic Information System (GIS); **4**: 115.
The Geographic Resources Analysis Support System (GRASS); **4**: 115.
The grand obsession — drill and practice; **1**: 2.
Graphical User Interface (GUI); **4**: 115, 139.
Group Decision Support System; **3**: 82.
Guided instruction; **2**: 42.
Guided instruction in critical thinking; **2**: 45.

h

Habilitative environments using computers; **1**: 3.
Heterogeneous and homogeneous ability grouping; **3**: 87.
Hierarchical, menu-driven graphical user interface for GRASS; **4**: 115.
History of the Queensland University of Technology (QUT) computer based education project; **3**: 74.
Homework and lessons online; **3**: 77.
"Hot words"; **4**: 115.
How a GDSS can be used for instructional purposes; **3**: 82.
How to best individualize instruction; **1**: 17.
Hypermedia; **2**: 71.
Hypertext; **4**: 131.
Hypertext disorientation; **4**: 115.
Hypertext glossary; **4**: 115.
Hypertext programming; **4**: 140.
Hypertext-based glossary system; **4**: 115.

i

IBM's *Critique*, an experimental text analysis program; **2**: 70.
IBM's *Writing to Read* (WTR) program; **4**: 138.
Idea Consolidator; **3**: 82.
Impact of heterogeneous and homogeneous ability grouping on achievement of students working cooperatively on a science task; **3**: 87.
Impact of the computer as a medium of writing instruction; **2**: 44.
Implications for instruction in critical thinking; **2**: 45.
Incidental learning; **2**: 43.
Incorporation of group activities with individualized training; **1**: 22.
Increasing ratio sequencing; **4**: 123.
Indirect instruction; **2**: 43.
Indirect instruction via telecommunication; **2**: 42.
  English; **4**: 42.
  science; **2**: 42.
Individual learning environment or lonely learning; **2**: 59.
Influential variables associated with school learning which optimize educational outcomes; **2**: 93.
Informal learning; **2**: 43.
Information management; **1**: 4.
Information structure; **2**: 57.
Informational directions; **1**: 6.
Instruction via interactive telecommunications; **2**: 69.
Instructional activities; **1**: 35.
Instructional advantages of IVI; **2**: 37.
Instructional technology; **4**: 137.
Instructional value of "learning-by-doing" activities; **4**: 114.
Instructional value of active versus passive forms of learning for promoting higher-order cognitive thinking; **4**: 111.
Integrated learning system (ILS); **2**: 58; **4**: 140.
Intelligent computer-aided instruction of study and metacognitive strategies; **4**: 140.
Inter-item confusability; **4**: 121.
Inter-repetition spacing; **4**: 119.
Interacting with video and graphic images at a very detailed level; **4**: 131.
Interaction between learning style and IVI; **1**: 17.
Interactions between cognitive processing time and pictorial attention directing presentation time; **2**: 65.
Interactive computer-based instructional simulation systems; **4**: 110.
Interactive media; **2**: 71.
Interactive video; **3**: 92, 95.
Interactive video instruction (IVI); **1**: 17; **2**: 37.
Interactive videodisc instruction; **3**: 86.
Interactive videodisc patient simulations; **4**: 125.
Interactivity in IVI; **2**: 37.
Interfaces; **4**: 139.
Issues surrounding the use of computers in the education process; **3**: 73.
Item sequencing; **4**: 119.
Item sequencing strategies; **4**: 119.
Item shuffling; **4**: 120.

j

Joyo (common use) kanji; **1**: 27.

k

Kanji characters; **1**: 27.
Kanji-Lookup; **1**: 27.
"Keyword search"; **4**: 116.
Knowledge base development; **4**: 139.
Knowledge of result (KOR); **4**: 128.
Knowledge-of-results (KR); **4**: 114.
Kolb's learning style inventory; **1**: 12, 17.
Kyoiku (educational) kanji; **1**: 27.

l

Lack of significant relationships between learning style and IVI effectiveness; **1**: 20.
Language learning; **1**: 27.
Large scale use of computers in the education process at a university; **3**: 73.
Learner control in IVI; **2**: 38.
Learner control with advisement; **2**: 47.
Learner-controlled instruction; **2**: 47, 71.
"Learning-by-doing" opportunities; **4**: 110.
Learning style preferences; **1**: 12.
Learning written Japanese; **1**: 27.
Lesson duration; **3**: 94, 96.
Linear video; **3**: 95.
Locus of control; **2**: 47.

m
"Magic Triangle" exercise; **3**: 88.
Matching presentation frequency to item difficulty; **4**: 120.
Maximizing unpredictability; **4**: 119.
Message design; **1**: 6.
Meteorology; **4**: 131.
Microcomputer simulation; **4**: 105.
Model of conceptual change; **4**: 106.
"More reading CAI is better"; **2**: 61.
Motivation; **4**: 119.
in IVI; **2**: 38.
Multimedia instruction; **4**: 131.
MUMPS; **1**: 28.

n
Navigational directions; **1**: 6.
Network use in central management of large university physics courses; **3**: 77.
Network-based tutorials in conjunction with bulletin boards; **2**: 45.
Non-content training system factors in CBT; **1**: 22.
NovaNET system; **3**: 77.
Novelty effect; **1**: 20.
Nursing and CAI; **1**: 13.

o
Observational learning; **4**: 111.
On-line, hypertext-based glossary system; **4**: 115.
Online weekly quizzes; **3**: 78.
Optimal sequencing of PA drill items; **4**: 119.
Over-learning; **1**: 2.
Overview of past educational computing practices; **1**: 1.

p
Pacing effect on subject performance; **2**: 67.
Pacing strategies; **2**: 64.
Paired-associate (PA) drill; **4**: 119.
Paired/individual study; **1**: 22.
The Path; **4**: 132.
PEPS; **1**: 13.
Physics; **3**: 77.
The Polygon; **4**: 134.
Potential GDSS applications in the classroom; **3**: 83.
Potential of CAI for teaching problem solving skills; **2**: 72.
Practicalities of successful CBE; **3**: 76.
Prescriptions in reading computer-assisted instruction; **2**: 58.
Price's learning style model; **1**: 12.
Problem-solving in dental education; **4**: 125.
Problem solving software; **2**: 72.
Process-oriented feedback; **2**: 70.
Product-oriented feedback; **2**: 70.
Production mentality; **2**: 62.
Productivity and attitude; **2**: 55.
Prototype virtual reality simulation system — SIMNET; **4**: 111.
Proximity of confusable items; **4**: 121.
Psychology of achievement motivation; **4**: 121.

r
R.O.A.D. (Real Opportunity for Advancement and Development) to Success; **1**: 33.
Rationale for adopting a hypertext environment; **4**: 115.
Readability principles; **1**: 35.
Reading; **4**: 138.
Restructuring training and education through technology; **2**: 71.
Retention interval; **4**: 120.
Role of competence motivation or achievement motivation in PA drill; **4**: 119.
Role-playing; **4**: 110.

s
Sampling-with-replacement strategy; **4**: 120.
Satisfaction with interactive video instruction; **1**: 19.
Self-efficacy theory; **1**: 7.
Shannon's information theory; **4**: 122.
Shuffle-plus-dropout strategy; **4**: 121.
SIMNET; **4**: 110.
SIMNET training program; **4**: 111.
Simulations in dental education; **4**: 125.
Social and social-cognitive learning environments which include computers; **1**: 3.
Social nature of learning; **1**: 25.
Social skills training; **3**: 92.
Software design; **3**: 100.
Spacing; **4**: 119.
Special education computing; **1**: 1.
Sports biomechanics; **3**: 100.
Student participation; **3**: 94, 97.
Student-instructor interaction; **1**: 22.
Students' attitudes toward CAI; **1**: 12.
Super Factory; **4**: 139.
System requirements for an instructional support system for adult professionals learning CAD; **2**: 56.

t
Tailoring CBI to meet the needs of a specific, well defined population; **2**: 67.
Taylor's trichotomy; **1**: 2.
Teacher encouragement and questioning; **3**: 94, 97.
Teacher instruction augmented by computers; **1**: 2.
Teaching problem-solving to early adolescents; **3**: 92.
Telecommunication benefits to teachers; **2**: 43.
Textual pacing treatments; **2**: 65.
Theoretical foundations of interactive video instruction; **2**: 37.
Theories of achievement motivation; **4**: 119.
Three-pool sequencing; **4**: 123.
Time flexibility for using CAIVDI; **1**: 15.
Time on task; **3**: 89.
Time required for CAD instruction; **2**: 54.
Training in prosocial skills; **3**: 92.
Transactions in computer-based instruction; **4**: 131.
Transactions in multimedia instruction; **4**: 131.
Transfer effects; **4**: 113.
Tutor, tool and tutee; **1**: 2.
Two-pool drill; **4**: 121.
Types of advisement; **2**: 47.
Types of directions embedded in CAI; **1**: 6.
Types of interactivity in IVI; **2**: 37.

u
Underlying processes inherent in direction-following behavior; **1**: 6.
Unique features of computer telecommunications; **2**: 45.
The University of Mississippi's GDSS; **4**: 82.
Unpredictability; **4**: 119.
Use of a university computer network to manage instruction in large physics courses; **3**: 77.
User confidence; **2**: 55.
User control; **2**: 56.
User disorientation in a hypertext environment; **4**: 115.
User reactions to XGRASS Glossary; **4**: 117.
Using a computer to teach reading and writing; **4**: 138.
Using a group decision support syste as a teaching tool; **3**: 82.
Using computers in the education process; **3**: 73.

v
Value of using a time-series approach for conducting a media transfer evaluation; **4**: 114.
Variation in cognitive processing time; **2**: 65.
Video and graphic images; **4**: 131.
Videodisc-based social skills training; **3**: 93.
Videotape modeling; **3**: 92.
Visuals in IVI; **2**: 38.
The *Vote* tool; **3**: 83.

w
Walk-in training concept; **2**: 54.
Wasatch Educational System; **4**: 140.
Weiner and Kukla's attributional theory of achievement motivation; **4**: 122.
Weiner's achievement motivation theory; **4**: 122.
"Window stacking"; **4**: 116.
Word processing; **4**: 138.
Working solution to the problem of user disorientation; **4**: 115.
Workplace literacy; **1**: 33.
Writing; **4**: 138.

x
X-window system and the OSF/Motif graphical user interface; **4**: 116.
XGRASS Glossary; **4**: 115.
The XGRASS solution to hypertext disorientation; **4**: 116.
